## **AMENDMENTS TO THE SPECIFICATION**

Docket No.: C1039.70058US00

Please substitute the followings paragraphs for the corresponding paragraphs of the specification.

Please replace the paragraph beginning on page 15 line 20 and ending on page 16, line 9 with the following amended paragraph:

In another embodiment the invention provides an isolated CpG oligonucleotide represented by at least the formula:

## 5'N<sub>1</sub>X<sub>1</sub>X<sub>2</sub>CGX<sub>3</sub>X<sub>4</sub>N<sub>2</sub>3'

wherein at least one nucleotide separates consecutive CpGs; X<sub>1</sub>X<sub>2</sub> are nucleotides selected from the group consisting of: GpT, GpG, GpA, ApA, ApT, ApG, CpT, CpA, CpG, TpA, TpT, and TpG; and X<sub>3</sub>X<sub>4</sub> are nucleotides selected from the group consisting of: TpT, CpT, ApT, TpG, ApG, CpG, TpC, ApC, CpC, TpA, ApA, and CpA; N is any nucleotide and N<sub>1</sub> and N<sub>2</sub> are nucleic acid sequences composed of from about 0-25 N's each. Preferably X<sub>1</sub>X<sub>2</sub> are GpA or GpT and X<sub>3</sub>X<sub>4</sub> are TpT. In other preferred embodiments X<sub>1</sub> or X<sub>2</sub> or both are purines and X<sub>3</sub> or X<sub>4</sub> or both are pyrimidines or X<sub>1</sub>X<sub>2</sub> are GpA and X<sub>3</sub> or X<sub>4</sub> or both are pyrimidines. In a preferred embodiment N<sub>1</sub> and N<sub>2</sub> of the nucleic acid do not contain a CCGG or CGCG quadmer or more than one CCG or CGG trimer. The effect of a a CCGG or CGCG quadmer or more than one CCG or CGG trimer depends in part on the status of the oligonucleotide backbone. For instance, if the oligonucleotide has a phosphodiester backbone or a chimeric backbone the inclusion of these sequences in the oligonucleotide will only have minimal if any affect on the biological activity of the oligonucleotide. If the backbone is completely phosphorothioate or significantly phosphorothioate then the inclusion of these sequences may have more influence on the biological activity or the kinetics of the biological activity. In another preferred embodiment the CpG oligonucleotide has the sequence 5'TCN<sub>1</sub>TX<sub>1</sub>X<sub>2</sub>CGX<sub>3</sub>X<sub>4</sub>3' (SEQ ID NO.: 99).
